### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: The 06/05/2003 Declaration of James T. Walter itself is sufficient to overcome the art rejection over Okita and sufficient to place the instant claims in condition for allowance. The declaration has successfully demonstrated that the structure of the present invention can only be achieved by modifying the laser to produce a very wide beam of relatively low and gradient power across the beam area (page 2, and exhibits 1-5). The declaration also shows that the ePTFE was treated both with an unfocused laser in accordance with the present invention and with a focused laser at different power settings in accordance with Example 3 of Okita. The focused laser at normal power settings cut through the ePTFE material whereas the unfocused laser created a series of finely grooved partial perforations in the surface of the material. Likewise, it is clearly apparent that the unique surface structure claimed in the present invention is achieved through such a modified process (i.e. by modifying conventional laser equipment to intentionally unfocus a laser beam). The declaration clearly establishes that such recited structures would not be achieved by the Okita reference. The structure claimed in the present invention is thus non-obvious over the Okita reference. The application should be in condition for allowance in view of the declaration of James T. Walter filed on 06/05/2003. There is no need for Applicants to file a supplemental declaration on 01/23/04 to overcome the art rejections over Okita and place the instant claims in condition for allowance. The examiner wishes to apologize for any confusion that may have been caused.
